

CLIMATE RISK REPORT

INVEST IN A MORE RESILIENT TOMORROW

The changing climate is a continually evolving business risk and staying resilient as an organization in the face of the increasing frequency and severity of climate-related events can be a challenge. Responding to the shifting regulatory landscape, as governments and regulatory bodies begin to mandate disclosure of ESG commitments and progress, FM Global has combined its wealth of proprietary research, advanced analytics and innovative technology to bring your climate risks into view with the Climate Risk Report.

MANAGE YOUR CLIMATE RISKS

By leveraging the latest advancements in analytics, your Climate Risk Report provides a unique view of your business's exposure to near-term, event-driven climate risk, as well as prioritized opportunities to improve your climate resilience.

Your climate risk report evaluates climate risks from both the frequency and severity perspectives, using probabilistic hazard maps and FM Global field engineering data (recommendations, loss scenarios, etc.), respectively.

ASSESS YOUR CLIMATE RISK PERILS

WIND

FLOOD

LIGHTNING

FREEZE

WILDFIRE

HAIL

YOUR CUSTOMIZED CLIMATE RISK REPORT INCLUDES:

- Identification of your locations with the greatest climate risk and those with the greatest opportunity for risk improvement (actionable risk)
- A high-level breakdown of your business's exposure to climate perils
- Your current and actionable climate risk score, indicating your current climate risk, degree of improvement available, and where your climate risk quality ranks, relative to other FM Global Group climate-exposed clients
- A breakdown of inherent and actionable climate risk across your enterprise
- A prioritization of opportunities to maximize improvements in your climate resilience at the site level, as well as at the recommendation level

HELP YOUR BUSINESS:

- Understand climate risk, its certainty and evolving nature
- Evaluate the impact of extreme weather events on your specific business locations
- Determine the ability of infrastructure to withstand a changing climate
- Navigate ESG reporting and regulation
- Make informed decisions about how to improve your climate resilience
